1 Getting Started

The Front Panel at a Glance 1-2

The Front Panel Indicators at a Glance 1-3

The Front Panel Menus at a Glance 1-5

The Display Annunciators at a Glance 1-8

The Display Special Characters at a Glance 1-9
The Underscore Placeholder 1-9
The Asterisk Placeholder 1-9

The Limit Test Graph Characters at a Glance 1-10

The Rear Panel at a Glance 1-11

Making Measurements 1-12
To Measure Frequency 1-14
To Select Input Coupling and Impedance 1-15
To Set Input Channel Trigger Level/Sensitivity 1-16
To Select Scale and Offset 1-19
To Set Limits of Measurements 1-22
To Perform Statistics on Measurements 1-30
To Control Measurement 1-36

2 Operating Your Frequency Counter

Introduction 2-2
Chapter Summary 2-2
Where to Find Some Key Working Examples 2-2

How this Counter Works for You 2-3

Summary of the Measurement Sequence 2-4

Using the Measurement Control Keys (Run and Stop/Single) 2-5
Overview of the Measurement Control Keys 2-5
To Use the Measurement Control Keys 2-6

Using Entry/Select (Arrow) Keys 2-8
To Use During Numeric Entry 2-8
To Use When Sequencing Through the Other Meas and Recall Menus 2-8
To Use During State Changing 2-9
To Use on Prompted Help Messages 2-9

Using the MEASURE Menu Keys 2-10
Overview of the MEASURE Menus 2-10
To Measure Frequency 2-11
To Measure Frequency Ratio 2-11
To Measure Period 2-12
To Measure Positive/Negative Volt Peaks 2-12

Using the Gate & External Arm Menu Key 2-13
Overview of Gate/External Arming Functions 2-13
To Use the Gate and External Arm 2-15

Using the MATH Menu Keys 2-19
Overview of Scale/Offset Math Menu 2-19
To Use the Scale/Offset Math Menu 2-20
Overview of Statistics (Stats) Menu 2-24
To Use the Stats Menu for Automatic and Continuous Statistical Analysis 2-25

Using the LIMITS Menu Keys 2-28
Overview of Limits Menus 2-28
To Set and Use Automatic Limit Testing 2-29

Using the DISPLAY Digits Keys 2-35
Overview of the DISPLAY Digits Keys 2-35
To Use the DISPLAY Digits Keys 2-35

Using CHANNEL 1 Input Conditioning Keys 2-37
Overview of Trigger/Sensitivity Menu 2-37
To Use the Trigger/Sensitivity Key to Adjust Counter's Trigger Voltage and Sensitivity Levels 2-40
Overview of Input Conditioning Toggle Keys 2-43

Using the Save and Recall Menus 2-44
Overview of Save and Recall Functions 2-44
To Use the Save Function 2-45
To Use the Recall Function 2-46
To Unsave a Measurement Setup 2-47

Using the Print Menu 2-48
Overview of the Print Menu 2-48
To Use the Print Menu 2-48

Using the Utility Menu 2-49
Overview of the Utility Menu 2-49
To Set the HP-IB Address 2-50
To Choose the Timebase Source 2-51
To Run the Self-Test Routines 2-52
To Configure the RS-232 Serial Port for Printing 2-54
To Configure the RS-232 Serial Port for Sending Limit-Detect Output 2-56
To Select the Numerical Convention for the Display 2-57
To Connect the Counter to a Serial Printer via the RS-232 Port 2-57
To Connect the Counter to a Printer via HP-IB 2-57
To Select the HP-IB Talk-Only Mode for Printing 2-58

Front Panel Display Messages 2-59
Measurement Result Displays 2-59
Power-Up/Self Test Messages 2-60
Menu Messages 2-61
HP-IB Messages 2-63

Preset Values After Power-up and *RST 2-64
Preset Values for Functions Accessible Via Front Panel or HP-IB 2-64
Preset Values for Functions Accessible Via HP-IB Only 2-68

Common Questions 2-70
Why is Stats result not available yet? 2-70
Why won't printer work? 2-70
Why did Counter stop measuring? 2-70
Why did Counter go to its default state after I set up my RS-232 port? 2-70
Counter's numeric display does not follow the numerical convention for my country. 2-70
