

- A range of audio & video connectors incorporating many innovative features. Assembly and disassembly is screw less and is achieved by a few quick turns of the back shell.
- a range of coloured plastic coding rings, each with a single number moulded in, offer a quick and easy system of channel identification.
 - internal design features allow for a quick and simple insert assembly.
- (Note : these connectors are not to be used for mains applications)
- pressed socket contacts which 'float' to assist plug mating, also ensuring a positive 'wrap-round' contact with the pin, since they can 'move' with the pins should any movement occur between mating connectors.
 - a single piece latch which is simple to operate, mating smoothly with both lockable and non-latching connectors.
 - the strain relief collet ensures a positive cable grip.
